

PRESENTATION OF
PKG EXPORTS PVT. LTD.

PKG EXPORT PVT LTD

ABOUT US

PKG Exports Pvt Ltd is the sister concern of Peekay Steel Industries(PSI) which is engaged in production of Bright Steel Bars since 1983. The plant is located adjacent to Kolkata (India) and production capacity is 10000MT per annum.

Bright Steel Bars at PKG is manufactured in Cold Drawn, Peeled & Ground condition in various shapes, sizes & specifications as per the Indian (IS) & International Standards (BS / SAE / EN / DIN / JIS etc.,). Products are manufactured under stringent quality control to meet the specific requirements of clients.

For providing consolidated package and solutions to it's clients' requirement, our group maintains a stock of approx 1000 MT in Calcutta and Bangalore of Bright Bars . In addition , we also are involved in independent trading of steel materials as enumerated below.

Due to experience of over four decades in the steel industry, we are supplying materials to leading consumers and dealers in Southern and Eastern India. Materials are well accepted by clients in the automobile, heavy engineering and fabrication sectors. In addition to domestic supplies, we export to Srilanka, Thailand, UAE, South Africa and Europe.

Production Sizes (Bright Bars)

Rounds:
2.5mm upto 100mm

Hexagonal:
10mm upto 75mm A/F

Squares:
5mm upto 75mm

Flats:
5-upto 25mm
thickness X 100mm
width.

BUSINESS ACTIVITY OF PKG

Trading of bright steel bars produced by Peekay Steel Industries
Independent trading of rolled long and flat steel products.
Imports and Exports of rolled and finished steels.

Materials:

Long Products

Sections like angles, channels, beams, joists etc.
Round Bars (Black and Bright), Deformed bars and Wire Rods
Steel Pipes - ERW / HFIW / Seamless / Saw Quality
Billets and Blooms

Specifications :

Grades:

Mild steel, Carbon Steel & Free-Cutting Steel as per IS and EN series.

APPLICATIONS

Bright steel bars are extensively used in the following:

Automotive - (Shock Absorber Piston Rods, Rack Bars, Head Rests and General Automotive Parts).

General Engineering Agriculture and machine building. Mining Repetition Engineering.

BRIGHT LEADED FREECUTTING STEEL

Typical Applications

Parts and components subject to moderate strength levels and relatively low shock loading, with machinability a major consideration.

BRIGHT NON - LEADED FREECUTTING STEEL

Typical Applications : Parts and components subject to moderate strength levels and relatively low shock loading, with machinability an important consideration.

BRIGHT COMMERCIAL QUALITY MILD STEEL-

Typical Applications

Axles, bolts, connecting rods, motor shafts, hydraulic shafts, pins, pump shafts, machinery parts etc. Or when carburised for camshafts, light duty gears, spindles and ratchets etc.

MEDIUM TENSILE STEEL-

Typical application

Axles, bolts, connecting rods, hydraulic rams, pins, rolls, spindles, shafts, studsetc, requiring higher strength or similar grades can provide.

Marketing

- The marketing activities of PSI is supported by it's stockholding at 6 warehouses cum distribution centers and also through dealers and direct marketing.
- The company has it's approved transporters , freight forwarders and clearing agents to handle the logistics of cost effective materials movement of raw materials and finished products.
- Materials are delivered within the agreed time to our clients in India and overseas.
- Together with a team of dedicated staff and commitment to stock holding, PSI is supplying directly to the following sectors:
 - Automotive
 - General Engineering Agriculture and machine building.
 - Mining
 - Repetition Engineering.
 - Forging

SUPPLIERS

PKG meets its requirement of raw materials from Government steel mills Visakhapatnam Steel Project and Steel Authority of India Ltd. It also buys from other private steel mills and suppliers from India and overseas. Materials are checked for their quality by the mills and third party surveyors prior to dispatch of materials to our works.

Quality Assurance

Quality to PKG means not only product quality or service quality but also cost, delivery and after sales service which goes with it. Responding to this concept of quality PKG has adopted quality systems appropriate to its clients.

PKG's commitment to product quality is reflected through quality systems adhered to from selection of raw material to dispatch of finished goods. Excellent traceability and identification are factors for our product and are maintained from receiving stage till dispatch.

PKG is committed to total quality which shall be achieved by timely delivery of quality products to the entire satisfaction of the customer and by continually improving its quality management system processes.

The Bright Steel Bars of PKG are characterized by a smooth surface, free from scale and harmful imperfections, tight dimensional tolerances, superior straightness and higher strength than hot-rolled products. They are ideally suited to machining and shafting applications
